

# ALPHABETICAL INDEX

Names of authors are in capitals, subjects in lower case roman, and localities in *italics*; book reviews are placed at the end.

- Acid-mine drainage (AMD), relationships of soluble, suspended and deposited metal in fluvial systems near sources of, 325
- Adcumulate, and chemically stratified plutonic igneous rocks, 99
- Adcumulus growth, within chemically stratified and adcumulate plutonic igneous rocks, 99
- Aenigmatite-group, solid solution among members of the, 982
- AFRICA, minor and trace element chemistry of carbonates, apatites and magnetites in carbonatites from, 415
- Age, of anthophyllite-gedrite from *Simiuttat, Nuuk* district, southern *West Greenland*, 937
- AHMED-SAID, Y., 541
- ALAPIETI, T., 973
- Aldan Shield, geochronology and mineral chemistry of the potassic alkaline ultramafic Inagli complex, 711
- Alkaline, potassic ultramafic Inagli complex, eastern *Siberia*, geochronology and mineral chemistry, 711
- Alkaline complex, at *Little Murun*, Aldan Shield, *Russia*: compositional variation in pyroxene and mica, 907
- ALLEN, A. R., 927
- Aluminate sodalite, twinning in an orthorhombic phase, 617
- Aluminous titanites, produced under ultra-high pressure, in carbonate-bearing eclogites at *Shuanghe* in *Dabieshan*, central *China*, 461
- Alunite-type minerals, from *Broken Hill*, *New South Wales*: compositional segregation and solid solution, 779
- Amorphization, under high pressures, of anorthite: length scale dependence, 493
- AMTHAUER, G., 842
- Analcime, high-resolution neutron powder diffraction of, 499
- Andradite, comment on 'Morimotoite,  $\text{Ca}_3\text{TiFe}^{2+}\text{Si}_3\text{O}_{12}$ , a new titanian garnet from *Fuka, Okayama Prefecture, Japan*' by Henmi *et al.*(1995), 842
- Annealing, and recrystallization of pyrrhotites in some sulphide ores from *Norway*, 303
- Annite (Fe-bearing), from *Mont Saint-Hilaire, Québec*, 447
- Anorthite, length scale dependence of high-pressure amorphization: the static amorphization of, 493
- Antarctic Peninsula*, eruption of small volumes of alkalic basalts following successive ridge crest-trench collisions along the, 173
- Anthophyllite-gedrite, orthoamphibolite pods within quartz-cordierite gneisses at *Simiuttat, Nuuk* district, southern *West Greenland*: composition, exsolution, age, 937
- Anti-glass, length scale dependence of high-pressure amorphization: the static amorphization of anorthite regarded as an, 493
- Apatite, chemistry and *REE* transport as evidence of metasomatism in the North Qôroq centre, South *Greenland*, 207
- Apatites, carbonates and magnetites in some African carbonatites: minor and trace element chemistry, 415
- Apatites, with varying fluorine and chlorine contents from magnetite-apatite ores in northern *Chile* and their ore-genetic implications, 285
- Arabian Gulf*, origin and composition of massicot, litharge (PbO) and a mixed oxide of lead used as traditional medicine in the, 509
- Arcu Su Linnarbu*, natural ferrous substituted saléeite from *Sardinia*, 647
- Argentopentlandite, enclosed within early tin-bearing chalcopyrite from the Northern Pennine Orefield, 317
- Armalcolite, and pseudobrookite crystallized from synthetic melts, 347
- As, cadmium substitution in miargyrite ( $\text{AgSbS}_2$ ) and related phases: an experimental reconnaissance, 393
- ATENCIO, D., 841
- ATHERTON, M. P., 163
- Atomic arrangement, of ojuelaite,  $\text{ZnFe}_3^{2+}(\text{AsO}_4)_2(\text{OH})_2 \cdot 4\text{H}_2\text{O}$ , 519
- Aurichalcite, Zn and Cu ordering in, 887
- AUSTRALIA, an unusual ruby-sapphire-sapphirine-spinel assemblage from the Tertiary Barrington volcanic province, *New South Wales*, 623; noëlbensonite a new BaMn silicate of the lawsonite structure type, from Woods mine, *New South Wales*, 369; solid solution and composi-

- tional segregation in the lead-dominant alunite-type minerals from *Broken Hill, New South Wales*, 779
- Ba-rich micas, from the Yindongzi-Daxigou Pb-Zn-Ag and Fe deposits, *Qinling*, northwestern *China*, 433
- Backscattered electron, imaging of microstructures using foreshoot detectors in the scanning electron microscope, 859
- Baddeleyite, pyrochlore and niobian zirconolite in the Kovdor carbonatite, *Kola Peninsula, Russia*, 639
- BAGHURST, D. R., 821
- BAIDYA, T. K., 836
- BALTATZIS, E., 551
- Banded chemical rocks, bearing Ba-rich micas from the Yindongzi-Daxigou Pb-Zn-Ag and Fe deposits, *Qinling*, northwestern *China*, 433
- Baotite (Nb-rich), in carbonatites and fenites at *Haast River, New Zealand*, 473
- Barian chlorite biotite and barian muscovite, from the Yindongzi-Daxigou Pb-Zn-Ag and Fe deposits, *Qinling*, northwestern *China*, 433
- Barium manganese silicate, noélbenzonite, a new mineral of the lawsonite structure type, from Woods mine, *New South Wales, Australia*, 369
- BARKOV, A., 973
- BARRETT, J., 821
- Barrington volcanic province, an unusual ruby-sapphire-sapphirine-spinel assemblage from *New South Wales, Australia*, 623
- BARTH, H., 672
- Basalt, compositional convection caused by olivine crystallization in a synthetic melt, 115
- BEATTIE, P. D., 513
- BELLATRECCIA, F., 751
- Benleonardite, and cervelleite: new occurrences from *Montana, USA*, 871
- Beryllium, lithium and boron in ocean island basalts from *French Polynesia*: implications for the B/Be and Li/Be ratios as tracers of subducted components, 563
- BEVAN, D. J. M., 779, 805
- Bi, cadmium substitution in miargyrite ( $\text{AgSbS}_2$ ) and related phases: an experimental reconnaissance, 393
- Biotite (Fe-bearing), from *Mont Saint-Hilaire, Québec*, 447
- BIRCH, W. D., 787
- Bismuth minerals, clinobisvanite, eulytite and namibite from the Pala pegmatite district, *San Diego Co., California, USA*, 387
- Bismuth-bearing assemblages, from the Northern Pennine Orefield, 317
- Bismuthinite-bearing quartz veins, from the Northern Pennine Orefield, 317
- Bitumen, and mineral phases in the *Oklo* Proterozoic natural fission reactors, *Gabon*, 581
- BLOODAXE, E. S., 519
- Blueschist-to-greenschist transition, and the *P-T* path of prasinites from the *Lavrion* area, *Greece*, 551
- Bond valence calculations, and crystal structure refinement of carminite, 805
- Boron, lithium and beryllium in ocean island basalts from *French Polynesia*: implications for the B/Be and Li/Be ratios as tracers of subducted components, 563
- Boron-rich prismatine, revalidation, 483
- BOULT, S., 325
- Branching mineral growth model and simulation from cooling contacts and glasses, 595
- BRAZIL, ferazite is identical to gorceixite from *Minas Gerais*, 841
- Bromine, geochemistry of British groundwaters, 275
- BRYON, D. N., 163
- BUSECK, P. R., 799
- Bushveld complex, compositional cyclicity in a pyroxenitic layer from the main western zone, 149; re-evaluation of magma compositions and processes in the uppermost critical zone, 131
- Cadmium substitution, in miargyrite ( $\text{AgSbS}_2$ ) and related phases: an experimental reconnaissance, 393
- Calcites, recognition and significance of multiple fluid inclusion generations in telogenetic calcite, 813
- Calcsilicate bands, from *Mérida (Spain)* contact-metamorphic aureole: implications for fluid flow from fractal analysis, 986
- Caledonian, minettes from Northern *Britain*: geochemical implications for the Caledonian sub-continental lithospheric mantle, 221
- Calibration, of radial and longitudinal temperature gradients in cold-seal pressure vessels, 337
- CAMAITI, M., 663
- CANADA, Fe-bearing trioctahedral micas from *Mont Saint-Hilaire, Québec*, 447; transition metal rutiles and titanites from the Deadhorse Creek diatreme complex, northwestern *Ontario*, 403
- Cancrinite, thermal expansion of, 949
- CANNING, J. C., 221
- CAPRILLI, E., 751
- Carbonate-bearing eclogites, at *Shuanghe in Dabieshan*, central *China*, exhibiting ultra-high pressure aluminous titanites, 461
- Carbonates, apatites and magnetites in some African carbonatites: minor and trace element chemistry, 415
- Carbonatite, exhibiting pyrochlore at *Lueshe, Zaire*, 731; occurrence of niobian zirconolite, pyrochlore and baddeleyite in the Russian Kovdor, 623; and

- fenites at *Haast River, New Zealand*, exhibiting Nb-rich baotite, 473; Africa, minor and trace element chemistry of carbonates, apatites and magnetites, 415
- CARBONIN, S., 355, 603
- Carminite, crystal structure refinement and bond valence calculations, 805
- CARSWELL, D. A., 461
- Cassiterite-bearing chalcopyrite, from the Northern Pennine Orefield, 317
- Cathodoluminescence, used to show complex zonation in metasomatic apatites from the North Qôroq centre, *South Greenland*, 207
- Cation distribution, in some natural spinels from X-ray diffraction and Mössbauer spectroscopy, 355
- CAWTHORN, R. G., 131
- Cell parameters, of iridescent anthophyllite-gedrite from *Simiuttat, Nuuk* district, southern *West Greenland*, 937
- Cell parameters, of monazite-(Ce) from the Vico volcanic complex, *Latium, Italy*, 751
- Cellular precipitates, of iron oxide in olivine in a stratospheric interplanetary dust particle, 877
- Centennial Eureka mine, leisingite,  $\text{Cu}(\text{Mg,Cu,Fe,Zn})_2\text{Te}^{6+}\text{O}_6 \cdot 6\text{H}_2\text{O}$ , a new mineral from *Juab County, Utah*, 653
- Cervelleite, and benleonardite: new occurrences from *Montana, USA*, 871
- CHALAPATHI RAO, N. V., 513
- CHAMBERS, A. D., 207
- CHAO, G. Y., 447
- CHARNOCK, J. M., 887
- Charoitic rocks, frankamenite: a new mineral from *Yakutia*, 897
- CHEADLE, M. J., 163
- Chemically, stratified and adcumulate plutonic igneous rocks, 99
- Chernikovite and meta-ankoleite, synthetic solubility and spectrochemical characteristics, 759
- CHILE, variations in F and Cl contents in apatites from magnetite-apatite ores, 285
- CHINA, Ba-rich micas from the Yindongzi-Daxigou Pb-Zn-Ag and Fe deposits, *Qinling*, 433; ultra-high pressure aluminous titanites in carbonate-bearing eclogites at *Shuanghe, Dabieshan*, 461
- Chlorine, and fluorine contents varying in apatites from magnetite-apatite ores in *Northern Chile* and their ore-genetic implications, 285
- Chromite, ore bodies in Nausahi ultramafites at *Orissa, India*, containing the rare hydrated magnesium chrome carbonate stichtite, 836
- CLARK, A. M., 523, 675, 841
- CLARK, G. R., 937
- Cleavage planes, as migration pathways for fresh water within telogenetic calcites, 813
- Clinobisvanite, eulytite and namibite from the Pala pegmatite district, *San Diego Co., California, USA*, 387
- Clinopyroxene, *in-situ* differentiation within the *Shiant Isles* main sill producing strong zoning, 67
- Cobaltite-gersdorffite, and osmian hollingworthite from the Lukkulaivaara layered intrusion, *Russian Karelia*, 973
- COENRAADS, R. R., 623
- Coesite, from quartz-jadeitite in the *Dabie Mountains, Eastern China*, 659
- Coffinite, with rare earth elements and Ce-rich françoisite-(Nd) from sandstone beneath a natural fission reactor at *Bangombé, Gabon*, 665
- COGON, L., 517
- Cold-seal pressure vessels, temperature gradients in, 337
- COLEYSHAW, E. S., 821
- COLLEY, H., 285
- Composition, and origin of massicot, litharge (PbO) and a mixed oxide of lead used as traditional medicine in the *Arabian Gulf*, 509; of iridescent anthophyllite-gedrite from *Simiuttat, Nuuk* district, southern *West Greenland*, 937
- Compositional convection, caused by olivine crystallization in a synthetic basalt melt, 115; melt movement and the occlusion of porosity in crystallizing granitic systems, 163
- Compositional cyclicity, in a pyroxenitic layer from the main zone of the western Bushveld complex: evidence for repeated magma influx, 149
- Compositional segregation, and solid solution in the lead-dominant alunite-type minerals from *Broken Hill, New South Wales*, 779
- Compositional variation, of pyroxene and mica from the Little Murun ultrapotassic complex, Aldan Shield, *Russia*, 907
- Continental lithospheric mantle, late Caledonian minettes from *Northern Britain*: geochemical implications for the Caledonian sub-, 221
- Contrast images, of microstructures in rocks using focusscatter detectors in the scanning electron microscope, 859
- Convection, compositional, olivine crystallization in a synthetic basalt melt causing, 115
- Cooling contacts, and glasses used to model and simulate branching mineral growth, 595
- COOMBS, D. S., 369
- COOPER, A. F., 473
- COOPER, M. A., 483
- Cosalite, enclosed within early tin-bearing chalcopyrite from the Northern Pennine Orefield, 317
- COULSON, I. M., 207
- CRESSEY, B. A., 887
- CRESSEY, G., 887
- Critical zone, re-evaluation of magma compositions and processes in the uppermost Bushveld complex, 131
- Crystal chemistry, of danalite from Daba Shabeli

- Complex (N *Somalia*), 375; of monazite-(Ce) from the Vico volcanic complex, *Latium, Italy*, 751
- Crystal structure, of carminite: refinement and bond valence calculations, 805; of frankamenite, 897; of ojuelaite,  $ZnFe_3^{2+}(AsO_4)_2(OH)_2 \cdot 4H_2O$ , 519; of viséite from X-ray diffraction and nuclear magnetic resonance, 957
- Crystal structure refinement, of matlockite, 833
- Crystal-melt reactions, and picrite sills in the Honningsvåg intrusive suite, northern *Norway*, 53
- Crystallization, from stratified magmas in the Honningsvåg intrusive suite, northern *Norway*: a reappraisal, 41
- Crystallizing boundary layer, constraints on chemical and mineralogical compositions of plutonic rocks imposed by the, 99
- Crystallizing granitic systems, melt movement and the occlusion of porosity in, 163
- Cu and Zn ordering, in aurichalcite and hydrozincite, 887
- Cumulates, fractional crystallization and assimilation of country rock producing chemical variation in the cumulates of the Honningsvåg intrusive suite, northern *Norway*, 41; picrite sills and crystal-melt reactions intrusive into gabbroic cumulates in the Honningsvåg intrusive suite, northern *Norway*, 53
- Cyclic units, within stratified magmas of the Honningsvåg intrusive suite, northern *Norway*, 41; within the Bushveld complex – a re-evaluation of magma compositions and processes, 131
- Daba Shabeli Complex, crystal chemistry of Somali danalite from, 375
- DALTON, J. A., 337
- DALTRY, V. D. C., 675, 523
- Danalite, crystal chemistry of, 375
- DAWSON, J. B., 415
- Debye Scherrer powder camera, ultrasonic probe for the extraction of microscopic quantities of minerals, 829
- DELLA GIUSTA, A., 355, 603
- DELLA VENTURA, G., 751
- Deposited, soluble and suspended metal relationships in fluvial systems near sources of acid-mine drainage, 325
- Deuteration, and synthesis of minerals using microwave techniques with particular reference to scorodite,  $FeAsO_4 \cdot 2H_2O$ , 821
- Diatreme complex, at *Deadhorse Creek*, northwestern *Ontario, Canada* containing transition metal rutiles and titanites, 403
- Differentiated basaltic sill, the *Shiant Isles* main sill – a classic example, 67
- Diffusion-limited aggregation, growth of minerals modelled and simulated from cooling contacts and glasses, 595
- Diopside, evolved to pyroxene from the Little Murun ultrapotassic complex, Aldan Shield, *Russia*: compositional variation, 907
- Disorder, in a natural Mg-Al-Fe<sup>2+</sup>-Fe<sup>3+</sup>-spinel, 603
- DONALDSON, C. H., 115
- DOSTAL, J., 563
- Double-diffusive convection, within the stratified magmas of the Honningsvåg intrusive suite, northern *Norway*, 41
- DOVE, M. T., 499
- DREXLER, J. W., 519
- DUDOIGNON, P., 563
- DUPUY, C., 563
- East Pacific Rise, melt-peridotite interactions in shallow mantle at the, 191
- Eclogites (carbonate-bearing), with ultra-high pressure aluminous titanites at *Shuanghe* in *Dabieshan*, central *China*, 461
- EDGAR, A. D., 243
- EDMONDS, W. M., 275
- EDWARDS, R., 427
- EDWARDS, S. J., 191
- Effenbergerite, wesselsite  $SrCu[Si_4O_{10}]$ , a new member of the gillespite-group and end-member of a solid solution series, 795
- Electron microprobe analyses, of leisingite,  $Cu(Mg,Cu,Fe,Zn)_2Te^{6+}O_6 \cdot 6H_2O$ , a new mineral species from the Centennial Eureka mine, *Juab County, Utah*, 653
- ELTON, N. J., 517, 671
- Eulytite, clinobisvanite and namibite from the Pala pegmatite district, *San Diego Co., California, USA*, 387
- Evolution, solidification fronts and magmatic, 5
- EWING, R., 665
- Exsolution textures in intergrowths of hexagonal and monoclinic pyrrhotites in some sulphide ores from *Norway*, 303
- Extraction, of microscopic quantities of minerals for X-ray work using an ultrasonic probe, 829
- Fe, Pb-Zn-Ag deposits containing Ba-rich micas, from *Qinling*, northwestern *China*, 433
- Fe-bearing, trioctahedral micas from *Mont Saint-Hilaire, Québec, Canada*, 447
- Fe-Mn phosphate, mineral association of the granitic pegmatites of the *Fregeneda* area (*Salamanca, Spain*), 767
- FEHR, K.T., 842
- Fenites, and carbonatites at *Haast River, New Zealand*, exhibiting Nb-rich baotite, 473
- FERNANDEZ-CALIANI, J. C., 986
- Ferrazite, is identical to gorceixite, 841
- Ferrous naturally substituted saléite, from *Arcu su Linnarbu, Capoterra, Cagliari, Sardinia*, 647

- FIORI, S., 751
- Fissionogenic rare earth elements, and Ce-rich françoisite-(Nd) in coffinite from sandstone beneath a natural fission reactor at *Bangombé, Gabon*, 665
- FLOYD, P.A., 697
- Fluid flow, fractal geometry of calcsilicate bands from *Mérida (Spain)* contact-metamorphic aureole: implications for, 986
- Fluid inclusions (multiple), recognition and significance in telogenetic calcites, 813
- Fluorine, and chlorine contents varying in apatites from magnetite-apatite ores in northern *Chile* and their ore-genetic implications, 285; in igneous rocks and minerals with emphasis on ultrapotassic mafic and ultramafic magmas and their mantle source regions, 243
- Fluvial metal transport, near sources of acid mine-drainage: relationships of soluble, suspended and deposited metal, 325
- FONTAN, F., 767
- FOORD, E. E., 387, 787
- Forescatter detectors, in the scanning electron microscope used to contrast image microstructures, 859
- Formation waters, controls on halogen concentrations in sedimentary, 259
- Fourier transform infrared spectra, of vaterite present in bonding mortars of marble inlays from *Florence Cathedral*, 663
- FOWLER, A. D., 595
- Fractal geometry, of calcsilicate bands from *Mérida (Spain)* contact-metamorphic aureole: implications for fluid flow, 986
- Fractionation trends, and structure of the *Shiant Isles* main sill, 67
- Fractionation, within the Bushveld complex – a re-evaluation of magma compositions and processes, 131
- Françoisite-(Nd), in phosphatian coffinite with rare earth elements from sandstone beneath a natural fission reactor at *Bangombé, Gabon*, 665
- Frankamenite, crystal structure of, 897
- FRATINI, F., 663
- French Polynesian*, ocean island basalts and their lithium, boron and beryllium distribution: implications for the B/Be and Li/Be ratios as tracers of subducted components, 563
- Fresh water, within fluid inclusions in telogenetic calcites, 813
- Fronts, magmatic evolution and solidification, 5
- GABON, bitumen and mineral phases in the *Oklo* Proterozoic natural fission reactors, 581; phosphatian coffinite with rare earth elements and Ce-rich françoisite-(Nd) from sandstone beneath a natural fission reactor at *Bangombé*, 665
- GALAN, E., 986
- Galena, found in association with siegenite at the Great Orme mine, *Llandudno, North Wales*, 978
- Gardar*, province syenite centres, *South Greenland*: evidence of metasomatism from apatite chemistry and REE transport, 207
- Garnet, comment on 'Morimotoite,  $\text{Ca}_3\text{TiFe}^{2+}\text{Si}_3\text{O}_{12}$ , a new titanian garnet from *Fuka, Okayama Prefecture, Japan*' by Henmi *et al.*(1995), 842
- GASKARTH, J. W., 221
- GAULT, R. A., 653
- Gedrite-anthophyllite, orthoamphibolite pods within quartz-cordierite gneisses at *Simiuttat, Nuuk* district, southern *West Greenland*: composition, exsolution, age, 937
- Geochemical evidence, from the Sarikaraman ophiolite, *Aksaray, Turkey*, 697
- Geochemistry, of bromine in British groundwaters, 275; of late Caledonian minettes from *Northern Britain*: implications for the Caledonian subcontinental lithospheric mantle, 221
- Geochronology, and mineral chemistry of the potassic alkaline ultramafic Inagli complex, Aldan Shield, eastern *Siberia*, 711
- GERMANY, revalidation of prismatic for boron-rich compositions from *Waldheim*, 483
- GIBB, F. G. F., 1, 67, 337
- GIBBS, R. B., 787
- Gies mine (*Montana*), two new occurrences of benleonardite, and a possible new occurrence of cervelleite, 871
- GIESTER, G., 795
- GILLARD, R. D., 427
- Gillespite group, wesselsite  $\text{SrCu}[\text{Si}_4\text{O}_{10}]$ , a new member from the Kalahari Manganese Field, *South Africa*, 795
- Glasses, and cooling contacts used to model and simulate branching mineral growth, 595
- GÖNCÜOĞLU, M. C., 697
- Gorceixite, ferrazite is identical to, 841
- Granitic pegmatites, of the *Fregeneda* area (*Salamanca, Spain*) containing Fe-Mn phosphates, 767
- Granitic systems, melt movement and the occlusion of porosity, 163
- Great Glen Fault, as an apparent boundary between two distinct lithospheric mantle domains in *Northern Britain*, 221
- Great Orme Mine, *Llandudno, North Wales*, and its siegenite-bearing assemblages, 978
- GREECE, blueschist-to-greenschist transition and the *P-T* path of prasinites from *Lavrion*, 551
- GREENLAND, metasomatism as evidenced by apatite chemistry and REE transport in the North Qôroq centre, 207
- Greenschists, from blueschists, the transition and the *P-T* path of prasinites from the *Lavrion* area, *Greece*, 551

- GREW, E. S., 483  
 GRICE, J. D., 653, 847  
 GRIFFITH, W. P., 821  
 GROAT, L. A., 653  
 Grossular-wollastonite vesuvianite skarn, from the Omev Granite, *Connemara*, western *Ireland*, with special reference to the chemistry of vesuvianite, 541  
 Groundwaters, bromine geochemistry of, 275  
 Hallimond Lecture, 5  
 Halogen, concentrations controlled in sedimentary formation waters, 259; content variations in apatites from magnetite-apatite ores in *Northern Chile* and their ore-genetic implications, 285  
 Harzburgite, produced by partial melting of peridotite in shallow mantle at the East Pacific Rise: evidence from ODP site 895 (Hess Deep), 191  
 HASSAN, I., 617, 799, 949  
 Häuyne, nosean and lazurite, twinning in, 617  
 HAWTHORNE, F. C., 483  
 HENDERSON, C. M. B., 1, 67, 887  
 HENDERSON, G. S., 937  
 Hess Deep, melt-peridotite interactions in shallow mantle at the East Pacific Rise: evidence from ODP site 895, 191  
 Hexagonal and monoclinic intergrowths, of pyrrhotites in some sulphide ores from *Norway*, 303  
 Hidalgoite, and other lead-dominant alunite-type minerals, from *Broken Hill*, *New South Wales*: compositional segregation and solid solution, 779  
 High resolution transmission electron microscopy (HRTEM), study of  $MgSiO_3$  perovskite, 799  
 High-MgO parent melt, of the potassic alkaline ultramafic Inagli complex, Aldan Shield, eastern *Siberia*, 711  
 High-pressure amorphization, the static amorphization of anorthite, 493  
 High-resolution, neutron powder diffraction of analcime, 499  
 HOLE, M. J., 173  
 Hollingworthite (osmian), and rhodian cobaltite-gersdorffite from the Lukkulaivaara layered intrusion, Russian *Karelia*, 973  
 HOOPER, J. J., 517  
 Hornfelsing, and the conditions of metamorphism of a grossular-wollastonite vesuvianite skarn from the Omev Granite, western *Ireland*, 541  
 HUGHES, J. M., 519  
 HUNTER, R. H., 163  
 Huttonite-monzazite, solid-solutions from the Vico volcanic complex, *Latium*, *Italy*, 751  
 Hydrated potassium iron phosphate, meurigite: new fibrous iron phosphate resembling kidwellite, 787  
 Hydrogen bonding network, of carminite described as part of a crystal structure refinement and bond valence calculations, 805  
 Hydrolysis of tin(II), and the stability of  $Sn_3O(OH)_2SO_4$ , 427  
 Hydrozincite, and aurichalcite examined by X-ray adsorption spectroscopy, 887  
 Igaliko complex, *South Greenland*: evidence of metasomatism from apatite chemistry and REE transport, 207  
 Igneous rocks, and fluorine distribution as evidence of their mantle source regions with emphasis on ultrapotassic mafic and ultramafic magmas, 243  
 Inagli intrusive complex, eastern *Siberia*, geochronology and mineral chemistry, 711  
 INDIA, larnitic kirschsteinite from the Kotakonda kimberlite, *Andhra Pradesh*, 513; phase transformation at elevated temperatures of stichtite [ $Mg_6Cr_2(OH)_{16}CO_3 \cdot 4H_2O$ ] from *Orissa*, 836  
 Infrared spectra, of synthetic chernikovite and meta-ankoleite, 759  
 Infrared-adsorption study, of leisingite,  $Cu(Mg,Cu,Fe,Zn)_2Te^{6+}O_6 \cdot 6H_2O$ , a new mineral species from the Centennial Eureka mine, *Juab County*, *Utah*, 653  
 Intergrowths, of hexagonal and monoclinic pyrrhotites in some sulphide ores from *Norway*, 303; of two orthorhombic forms of perovskite described in an HRTEM study of  $MgSiO_3$  perovskite, 799  
 Interplanetary dust particle (IDP), cellular precipitates of iron oxide in olivine in, 877  
 Intrusion, the *Shiant Isles* main sill, an example of a differentiated alkaline basic multiple intrusion, 67  
 IRELAND, *Connemara*, conditions of metamorphism of a grossular-wollastonite vesuvianite skarn from the Omev Granite, 541; *Donegal*, sericitization of plagioclase in the Rosses Granite Complex, 927  
 Iridescent, anthophyllite-gedrite from *Simiuttat*, *Nuuk* district, southern *West Greenland*: composition, exsolution, age, 937  
 Iron oxide, in olivine in a stratospheric interplanetary dust particle, 877  
 Italian Alps, temperature-dependent disorder in a natural Mg-Al-Fe<sup>2+</sup>-Fe<sup>3+</sup>-spinel from the Balmuccia peridotite, 603
